

REMARKS

Applicant has carefully reviewed the Official Action dated May 7, 2009 for the above identified patent application.

The Examiner's indication at page 2, paragraph 3 and 4, that Claims 1,3-9,12-23 and 25-27 are allowed, and that Claim 24 is directed to allow the subject matter, is gratefully acknowledged by Applicant.

At page 2, paragraph 2 of the Official Action, Claim 24 has been rejected under 35 USC Section 112, second paragraph, as being indefinite. The basis for this formal ground of rejection is that the recitation "the web height of the cover" at line 7 lacks sufficient antecedent basis.

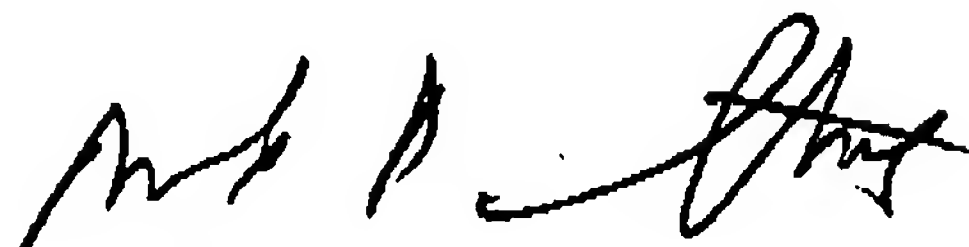

In response to this formal ground of rejection, the form of independent Claim 24 has been revised to provide antecedent basis for the recitation of "the web height of the cover". Additionally, the form of Claim 24 has also been revised to provide express antecedent basis for the recitation "the web height of the outer profile". The form of independent Claim 24 also has been revised to delete reference numeral "15" from line 6 of the claim, and replace it with reference number "14" to correct a typographical error. The outer profile is referred to by reference numeral "14" in both the original specification and drawings.

The form of Claim 17 has also been revised to correct an apparent spelling error.

Applicant respectfully requests that the amendments to Claims 17 and 24 be entered notwithstanding the final rejection. The revisions to Claims 17 and 24 are exclusively formal in nature, do not affect the scope or substance of the claims, and place this application in condition for allowance.

Applicant respectfully submits that this application is in proper form for allowance, and favorable action is respectfully requested.

Respectfully submitted,

Mark P. Stone
